TO WHOM IT MAY CONCERN

We are pleased to inform that we have worked with **SIGN INDUSTRIES LTD** of Dar es Salaam for various Road signs projects for mainland Tanzania as well as Zanzibar.

The signs supplied by them met all required parameters of reflective characteristics, material thicknesses and rigidity, edge stiffening, poles & posts, galvanizing of metal clamps and anti-rust treatment in areas required and vulnerable to outdoor weather conditions.

We also appreciate that the sales engineers of Sign Industries have the awareness of the requirements and their technicians have the expertise of reading and interpreting consultants' specifications, icons, pictograms and blueprints that facilitates in smooth execution of the whole project. Their in-depth knowledge has always made our task easier.

We must also express our appreciation for the timely execution of all jobs that were manufactured and delivered within the agreed timeline.

Having said this, we will not hesitate to recommend **SIGN INDUSTRIES LTD** to our national and international road contractors, consultants, project financiers and architects for any of their jobs.

Project Names:

- 1) Upgrading of Wazo Hill - Goba road to bitumen standard phase II: Goba – Madale (5.0km) in Dar es Salaam
- 2) Upgrading of Tungi – Kibada road (3.8km) to bitumen standard in Dar es Salaam.
- 3) Upgrading of Koani – Jumbi road (6.0km) to bitumen standard in Zanzibar.

Best Regards,

For and on behalf of MECCO LTD.

.....
RICCARDO QUASSOLO
PROJECT MANAGER.
